Remaining to be collected.	4643-4	—
Recovered on account of the year under report.	525	—
Remaining to be collected.	125	—

The cause of money remaining uncollected is due to the inability of the cultivators from failure of crops to pay in the instalments. Sufficient security for the recovery of each advance has been taken.

No advances have been made during the year under report, under the Land Improvement Act XXVI of 1871. It is learnt that no applications for advance under the Act were received.

8 The following table shows the Abkani revenue of these Talukkas.

Talukkas.	Spirits.		Loddy.		Gauze.		Opium.		Total.	
	Shops.	Amount.	Shops.	Amount.	Shops.	Amount.	Shops.	Amount.	Shops.	Amount.
Indi.	5	704	3	131	5	36	..	..	13	871
Indgi.	8	1124	6	90	2	42	2	9	18	1625
Total.	13	1828	9	221	7	78	2	9	31	2136

In Indi there has been a decrease of
134 -- -- Rupees in the revenue than
last year; probably on account of want
of spirit of competition and the poverty
of the inhabitants of the Taluk which
appears to have been most affected by
the consequences of the famine than any
other Taluk in the District.

In Sindri there has been an increase
473 Rupees and annas 8 in the Ryot
revenue this year. This appears to be
the result of competition and the better
state of the people there.

The Abkani revenue of these Talukas
is managed on the farming system.

I am sorry to observe that there are
no hydrometers to test the strength of the
country liquor manufactured in the
distilleries in this District. At my
suggestion you have been good enough
to take steps to obtain these instruments
from the Commissioner of Customs, for
salt and Abkani as far as my
knowledge is concerned.

The cause of money remaining uncollected is due to the inability of the cultivators from failure of crops to pay in the instalments. Sufficient security for the recovery of each advance has been taken.

No advances have been made during the year under report, under the Land Improvement Act XXVI of 1871. It is learnt that no applications for advance under the Act were received.

8 The following table shows the Abkari revenue of these Talukhs —

Talukhs.	Spirits.		Society.		Gauze.		Opium.		Salt.	
	Shops.	Amount.	Shops.	Amount.	Shops.	Amount.	Shops.	Amount.	Shops.	Amount.
Indi.	5	704	3	131	5	36	..	..	13	871

to possess means but would not pay unless recovered by Compulsory process.

I learn from my Shrivastadar that inquiry into the circumstances of each cultivator and holder of land was made at the time of the Jamabandi settlement by Mr. Ballbrister Deoras. Lists of such holders & cultivators with the amounts due, from those on enquiry it was found that arrears, were irrecoverable, have been submitted to you with a request to obtain the sanction of Government to write them off the accounts. The right of occupancy of these defaulters have been either sold or declared or might be declared forfeited. The amount recommended to be written off the accounts as irrecoverable in Indi is Rs 88,764-1-10 and in Sind Rs 99,619-5-9. A balance of 1,38,050-6-4 is due from defaulters coming under the

the 3 and 4 classes. It is hoped that these arrears will be recovered by the strenuous exertion of the Mamlatdars of both the Talukhas who seem to have satisfied my predecessor by due discharge of their duties.

10. The marginal statement

Talukhas.	Rain fall.			
	Average of the 5 preceding years.		Current year.	
	Inches	Cents	Inches	Cents
Indi.	26	38	26	52

up your time by giving a detail
of the same this year. In short
the injury to crops from the rats
was not of any considerable
extent this year.

In my humble opinion the
season on the whole has been
an average one. The condition
of the people in these Talukas is
generally speaking not good. They
are slowly and gradually re-
covering from the disastrous effects
of famine which was greatest
in these Talukas. The condition of
the people in Sindgi Taluka is
somewhat better than that of
the people in Indri which is pro-
verbially a poor Taluka even
before the famine.

11-11-11

11 The subjoined statement shows the extent of land under cultivation in the two Talukas during the year as compared with the area under cultivation during the year previous:-

up your time by giving a detail
of the same this year. I do not
think the injury to crops from the rats
was not of any considerable
extent this year.

In my humble opinion the
season on the whole has been
an average one. The condition
of the people in these Talukas is
generally speaking not good. They
are slowly and gradually re-
covering from the disastrous effects
of famine which was greatest
in these Talukas. The condition of
the people in Sindgi Taluka is
somewhat better than that of
the people in Indri which is pro-
verbially a poor Taluka even
before the famine.

11 The

11 The subjoined statement shows the extent of land under cultivation in the two Talukas during the year as compared with the area under cultivation during the year previous.

	Cultivation		More	Less.	habble area still curvailable	
	1878/79.	1879/80.				
Talukkas.						
1	377,242 31	302,853 26		74,389 5	87,303 39	
Lucchi						
2	373,528 37	288,598 6 7/4		84,930 30 33/4	100,503 22 1/2	
Total.	750,771 28	591,451 32 7/4		159,319 35 8 3/4	187,807 21 1/2	

Column

Column 5 of the above statement shows that there has been a decrease of $1,59,389 - 35 - 8\frac{3}{4}$ in the area of occupied lands of these Talukhas. The large falling off is due to the relinquishment of land held by persons who had no means of cultivating it, to the sale and forfeitures of land of those defaulters from whom area could not be recovered. The area of land actually under cultivation during the year under review with Kharif and Rabi Crops was 2,06,000 acres in Sadi and 2,61,931 - 22 acres in Sindgi Talukhas.

The area of arable land at the disposal of Government owing to the above mentioned causes has considerably increased but it is hoped that this land would be gradually taken up as the resources of the people improve by the successive good seasons.

VIII. Public Health.—

29 Two Dispensaries have been

Stated above been sanctioned one for each Talukha and the public are I learn anxiously waiting to see them constructed. They will be as provided in the five years Budget Scheme undertaken in 1881/82 and 1882/83.

Sanitation in Towns & Villages is enforced by making the people to keep their premises ^{& compounds} clean and employing Police Patils to look after the cleanliness of the villages and by punishing people who are found to commit nuisance.

30 As far as I am able to judge from the duplicate weekly returns which are received from the vaccinators vaccination progresses favorably in my charge. The people have commenced to see the advantages from getting their children vaccinated and opposition rose in one village in my charge.

total number of children vaccinated during the year is 1223 in Indi and 1228 in Sindgi Talukha.

31 The Population and Resources of my charge according to the annual Census

Talukha.	Human beings.			Houses.	Cattle.	Poultry.	Carts.
	Indi.	Sindgi.	Total.				
	30770	31515	62285	13787	53840	3133	576
	28897	31215	60112	15038	67237	4095	488
	59667	62730	122397	28825	121077	7228	1064

taken in July 1879 in village from to III are as per margin. The Mortuary and other returns of a general statistical nature have been tested in 17 villages in Indi and

24 in Sindgi Talukha. & appear to have been on the whole fairly kept.

A comparison of the figures in the

the above table with those of the Census taken in July 1878 shows the following result in the resources of these Talukhs. -

The decrease in the Population -

Population	Males.	Females	Total.	Houses.	Cattle.	Ploughs.	Carts.
According to the Census of July 1878 as per last year's Report.	68874	66563	135437	31015	108804	6292	1187
According to the Census of July 1879.	62285	60112	122397	28825	121017	7228	1064
Increase.	..	..	..	..	14273	936	..
Decrease.	6589	6451	13040	2190	..	..	123

as learnt from the municipal state-ment is 13040 or about 10 percent. There has been a marked decrease in the current year over that of the preceding year. I greatly doubt the accuracy of the Census taken by the village officers allow-

total number of children vaccinated during the year is 1223 in Indi and 1228 in Sindhi Salukha.

31. The Population and Resources of my charge according to the ann.

Human beings.		Indi.	Sindhi.	Total.	Annual Census
Salukha.	Male.	30770	31515	62285	taken in July

						936	
	6589	6451	13040	2190			123

According to the Census of July 1879.

Increase.

Decrease.

from the main principal state. The present is 3040 or about 10 percent. There has been a marked decrease in the current year over that of the preceding year. I greatly doubt the accuracy of the Census taken by the village.

ing for the extraordinary number of deaths from fever and ague in both the Talukars. The decrease in the number of houses may be attributed partly to emigration of people and partly to the want of means to build houses which had fallen down or were in ruins in the year and succeeding years of the famine.

In cattle and ploughs there has been good increase. This shows that the resources of the people in agricultural stock are improving and the people are animated with a desire to revive cultivation.

32. No epidemic such as Cholera and Small-pox or any special disease made its appearance in these Talukars during the year under report. The public health in both the Talukars was bad. Fever and ague caused great destruction of life. 2105 persons died from fever and ague

ague and 401 from other causes
in Indi. 1676 persons from fever &
ague and 781 from other causes
in Sindhi Talukad

This great mortality was I be-
lieve due to the causes brought
on by the famine on the emaciated
and distressed poor. A dispute
had arisen at Halsampicis to ex-
tramural burning ground but the
question has been amicably settled
by providing a suitable place for
the purpose. Nothing further seems
to have been done in this respect
this season.

There is no epidemic or any
special fatal disease among
Cattle which seem to fare very
well, the supply of pasturage and
fodder being plentiful.

VIII. — Education —

33 The number of schools in my
charge

ing for the extraordinary number of deaths from fever and ague in both the Talukhs. The decrease in the number of houses may be attributed partly to emigration of people and partly to the want of means to build houses which had fallen down or were in ruins in the year and succeeding years of the famine.

In cattle and ploughs there has been good increase. This shows that the resources of the people in agricultural stock are improving and the people are animated with a desire to revive cultivation.

32. No epidemic such as Cholera and small-pox or any special disease made its appearance in these Talukhs during the year under report. The public health in both the Talukhs was bad. Fever and ague caused great destruction of life. 2105 persons died from fever and

ague and 401 from other causes
in Indi. 1676 persons from fever &
ague and 781 from other causes
in Sindhi Taluk.

This great mortality was I believe due to the causes brought on by the famine on the emaciated and distressed poor. A dispute had arisen at Halsampicis to extramural burning ground but the question has been amicably settled by providing a suitable place for the purpose. Nothing further seems to have been done in this respect this season.

There is no epidemic or any special fatal disease among Cattle which seem to fare very well. The supply of pasturage and fodder being plentiful.

12-7-80

Administrative report-

No 1865 of 1880.

Kalady 31 July 1880.

Remarks on the Administration -
Report No 96, dated 9th July 1880, submitted
by P. B. Shrinivas Balaji, District
Deputy Collector.

I As P. B. Shrinivas Balaji has been
in charge of the office from 18th June 1880,
only the report refers almost entirely
to the administration under his prede-
cessor P. B. Balakrishna Deora.

II. Para 8. The want of hydrometers
is probably not restricted to this District
only. The abuses alleged to exist generally
are not decided nor is the necessity
for a special officer to look after the
Abkari revenue apparent. As there
are only 127 liquor shops in the whole
District, he would have very little to
do. Smuggling is not supposed to be car-
ried on to any extent & there is little
temptation

LHo/809

12-7-80

Administration report-

No 1865 of 1880

Kalady 31 July 1880

Remarks on the Administration -
Report No 96, dated 9th July 1880, submitted
by R. B. Shrinivas Balaji, District
Deputy Collector.

I As R. B. Shrinivas Balaji has been
in charge of the office from 18th June 1880,
only the report refers almost entirely
to the administration under his prede-
cessor R. B. Balakrishna Deoras.

II. Para 8. The want of hydrometers
is probably not restricted to this District
only. The abuses alleged to exist generally
are not specified, nor is the necessity
for a special officer to look after the
Akhar revenue apparent. As there
are only 12⁷ liquor shops in the whole
District, he would have very little to
do. Smuggling is not supposed to be car-
ried on to any extent & there is little
temptation

Administration report-

No 1865 of 1880.

Kalag 31 July 1880.

Remarks on the Administration -
Report No 96, dated 9th July 1880, submitted
by R. B. Shrinivas Balaji, District
Deputy Collector.

I As R. B. Shrinivas Balaji has been
in charge of the office from 18th June 1880,
only, the report refers almost entirely
to the administration under his prede-
cessor R. B. Balakrishna Deoras.

II. Para 8. "The want of hydrometers
is probably not restricted to this District
only. The abuses alleged to exist generally
are not specified, nor is the necessity
for a special officer to look after the
Atkari revenue apparent. As there -
are only 12¹/₂ liquor shops in the whole
District, he would have very little to
do. Smuggling is not supposed to be car-
ried on to any extent & there is little
temptation

temptation to engage in it, as the licensed shops are amply sufficient for the demand.

III. Para. 90 Government Resolution No. 2942, dated 10th October 1867, directed that the 1st class Magistrates in charge of Talukas should scrutinize the Magistrate's returns of cases, in which the accused were acquitted or discharged. The rule laid down in the High Court Circular Orders, Page 81, is that such returns be sent to the District Magistrate, through the Divisional Magistrate, & as there are no Divisional Magistrates in this District the previous practice has been discontinued. The return of the proceedings in every case in which the accused is convicted are sent direct to the District Magistrate & the 1st class Magistrates have no opportunity of scrutinizing them. It therefore appears desirable to revert to the former practice, which gave the 1st class Magistrates an opportunity of scrutinizing the subordinate Magistrate's proceedings, in cases in which convictions were

were not obtained, & for this purpose, amendment might be made in the Court Circular

IV. Paras 31932. Indi & Shindgi Talukas, which constitute the District Deputy Collector's Charge & Muddesara Taluka suffered more severely than any other part of the District from the famine of last year. The rats were most destructive in these Talukas. Many persons of the labouring classes emigrated in hope of obtaining employment & the Census of July 1879 was taken before there was an abatement in the distress or inducement to the emigrants to return to their homes. The decrease of 13,040 in the population during the year, ending 31st July 1879 is therefore only partly attributable to the mortality, & as has been remarked every year since the famine, there were few births to compensate for it.

V. The number of schools visited by S. B. D. Krishna Deoras was only 13 and
the

temptation to engage in it, as the license
shops are amply sufficient for the demand.

III. Para 20 Government Resolution No.
2942, dated 10th October 1867, directed that
the 1st class Magistrates in charge of
Talukas should scrutinize the Magistrate's
returns of cases, in which the accused were
acquitted or discharged. The rule laid
down in the High Court Circular Orders,
Page 81, is that such returns be sent
to the District Magistrate, through the Di-
visional Magistrate, & as there are no
Divisional Magistrates in this District
the previous practice has been disconti-
nued. The return & the proceedings in
every case in which the accused is con-
victed are sent direct to the District
Magistrate & the 1st class Magistrates
have no opportunity of scrutinizing the
same. It therefore appears desirable to revert
to the former practice, which gave the
1st class Magistrates an opportunity of
scrutinizing the subordinate Magistrate's
proceedings, in cases in which convictions
were

were not obtained, & for this purpose an amendment might be made in the High Courts Circular.

IV. Paras 31 & 32. In the Andhra Pradesh Talukas, which constitute the District Deputy Collector's Charge, & Muddachal Taluka suffered more severely than any other part of the District from the famine of last year, again the rats were most destructive in these Talukas. Many persons of the labouring classes emigrated in hope of obtaining employment & the Census of July 1879 was taken before there was an abatement in the distress or inducement to the emigrants to return to their homes. The decrease of 13,040 in the population during the year, ending 31st July 1879 is therefore only partly attributable to the mortality, & as has been remarked every year since the famine, there were few births to compensate for it.

The number of schools visited by
3. Balakrishna Deoras was only 13 and
the

temptation to engage in it, as the licensed shops are amply sufficient for the demand.

III. Para 20 Government Resolution No. 2942, dated 10th October 1867, directed that the 1st class Magistrates in charge of Talukas should scrutinize the Magisterial returns of cases, in which the accused were acquitted or discharged. The rule laid down in the High Court Circular Orders, Page 81, is that such returns be sent to the District Magistrate, through the Divisional Magistrate, & as there are no Divisional Magistrates in this District, the previous practice has been discontinued. The return & the proceedings in every case in which the accused is convicted are sent direct to the District Magistrate & the 1st class Magistrates have no opportunity of scrutinizing them. It therefore appears desirable to revert to the former practice, which gave the 1st class Magistrates an opportunity of scrutinizing the subordinate Magistrates proceedings, in cases in which convictions were

were not obtained, & for this purpose, an amendment might be made in the High Courts' Circular.

IV. Paras 31 & 32. Indi & Muddaji Talukas, which constitute the District Deputy Collector's Charge & Muddabihal Taluka suffered more severely than any other part of the District from the famine of last year again, the rats were most destructive in these Talukas. Many persons of the labouring classes emigrated in hope of obtaining employment & the Census of July, 1879 was taken before there was any abatement in the distress or inducement to the emigrants to return to their homes. The decrease of 13,440 in the population during the year, ending 31st July 1879 is therefore only partly attributable to the mortality, & as has been remarked every year since the famine, there were few births to compensate for it.

V. The number of schools visited by Mr. B. Balakrishna Deoras was only 13 and
the

The number of villages in which he in-
spected boundary marks was also very
small, but it must be remembered
that he went on leave from 11th April.
During the rains he was obliged to remain
out in his Talukas to look after the
Famine Relief arrangements & in February
& March, he selected the lands for
forest Reserves in both Talukas. The
enquiry into the outstanding balances
was also a labourious & tedious work
with which he took great trouble & his
time was therefore fully occupied

Mr. Reid, who has been in charge of the Katadi District throughout the year, but there has unfortunately been several unavoidable changes during the staff of our collector. The season was on the whole a favorable one. The deforestation of the forest has prevented the spread of the pest during the earlier part of the year. The weather effectually checked the spread of the pest by the rain, which was abundant. The pest was abundant in the middle of July and the end of November. The consequence was that, as the rainfall was abundant, the early crops were fair & the late crops were good. Rural population decreased by 35,000 due to the great prevalence of death and illness, especially in the collector's area. Shows how defective the registration is in Katadi. The recorded birth rate is only 8.8 per mille. Public health during the year was good. What is particularly known as the Panama fever, which it has not altogether disappeared, was much less prevalent than in 1878/79. The attendance of outpatients at dispensaries has increased from 12,751 to 15,151. The number of vaccine operations has also declined. Agricultural stock shows an increase under every head except cattle. The number of horses, cattle, camels, and sheep from 1,84,551 to 2,12,132, and of sheep 7,40,000 to 2,26,212.

Kaladji

Head.

Mr. G. S. D. has been in charge of the Kaladji District throughout the year, but there has unfortunately been several unavoidable changes during the staff of an officer. The season was at the same as for the previous year, but the deposition of the rain was not so abundant as in the previous year. During the earlier part of the season, the rain was not so plentifully checked, partly by the wind & partly by the high temperature which were evident to the effect of the rain & the temperature were destroyed between the middle of July and the end of November. The consequence was that as the rainfall was reasonable, the early crops were fair & the late crops were good. Rural population decreased by 35,000, as the great preponderance of deaths over births, as shown in the District & the para, shows low deflection birth registration is in Kaladji. The recorded birth rate is only 8.3 per mille. Public health during the year was good and is particularly shown as the malarial fever, which it has not altogether disappeared, was much less prevalent than in 1978/79. The attendance of outpatients at dispensaries has increased from 12,751 to 18,151. The number of vaccine operations has also declined. Agricultural stock shows an increase under every head except goats. The number of horses cattle having risen from 1,84,551 to 2,12,132, and of sheep and goats from 2,26,212 to 2,45,024.

Kaladji

- Mr. Kidderson has been in charge of the Kaladji Concentrate throughout the year but there has unfortunately been several unavoidable changes among the staff of assistants. The season was on the whole a favorable one. The depredations of rats which prevailed to a considerable extent during the year have been to some extent

effectually checked partly by the sand & dampness partly by the various measures which were resorted to. The rats which were resorted to by the natives were destroyed between the middle of July and the end of November. The consequence was that as the rainfall was reasonable, the early crops were fair & the late crops were good.

Rural population decreased by 35,529. As the great prevalence of deaths and illness, as ^{exhibited} in the statistics of the para, shows how defective the sanitation is in Kaladji the malarial birth rate is only 8.8 per mille.

Public health during the year was good. What is particularly known as the Kachin fever, though it has not altogether disappeared, ^{was} much less prevalent than in 1878/79. The attendance of outpatients at dispensaries has increased from 12,751 to 13,551. The number of vaccine operations has also declined. Agricultural stock shows an increase under every head except "cattle". The number of house cattle having risen from 1,84,551 to 2,12,132, and of sheep from 2,36,212 to 2,45,022.

Patent has been secured, and, as the
Racoon was a good one, it was a
profit, and ~~the same~~ was no harm
in consequence. The price of the
the principal from the same was de-
cided, and that to a small extent
patent from the adjacent districts, the
obvious cause being the deficiency
of communications throughout the dis-
trict which confines cultivators to local
markets for the disposal of their produce.
Wheat has fallen from 4 to 11 decies per
bushel; Oats from 5 to 14 decies, & Indian from
12 to 23 decies. No. 229, & have been granted
as follows for the purchase of seed & cattle,
is estimated Rs. 10,000. Granted in the same
account last year.

2/ The famabandi settlement was
practically completed in all districts.
The results of the settlement are as under

The large decrease under the head
Land Rev. is due, as the collector
explains, to the redemption for the
first time of large tracts of land formerly
held without by individuals or
associates, & which have been lying
waste since the famine. The auction
sales of inferior farms held in July
1878 were prejudicially affected by
what then appeared to be the stormy
prospects of the coming season, and
to this cause, is due the decrease in
large revenue. The redemption of
4 1/2 lakhs of rupees on account
of arrears of d. rev. & d. Rindobor
sanctioned by G. O. No. 2001 of 8th June
for approval of the course which the
middle class has adopted in ~~the settlement~~

refraining from making this large
 sum off the accounts until he has
~~ascertained~~ ascertained what it will be
 possible to realize from the sale of
 the occupancies of crown land & the
 crown land has been reserved. When
 revenue paid to the extent of Rs. 7672.
 the cause have been already mentioned.
 the prices for 1884/85 have been 100 after
 increase of Rs. 11.10.0 or 37 per cent.
 land held. and 2 hands to the amount
 of Rs. 83.80.0 were expected to be cut.
 standing as 31st July, but the great
 proportion of this was due to the change
 of hands & introduced up to already
 referred to. No. 1.57,479 an account of
 arrears from former years were collected
 in 1884/85 during the past under review
 and adding this sum to the collections
 made in the same period as account

 that Rs. 62,616 in excess of the whole
 due for the year was collected,
 which is creditable to the revenue
 officers. The number of estates in the
 (864) and of cases of distraint (222)
 was not large considering the area
 through which the district has passed.
 Receipts from Provincial & District Road
 Dues show a slight increase, while

In reference to the remarks con-
 tained in his 23rd para the Collector
 is probably now aware that the
 duty of attending the law relating
 to forests is at the present time
 under the consideration of Govt.
 the 2d

Forest Expenditure has increased from
 Rs. 6148 to Rs. 8075. Receipts from
 No. 2470 to No. 2709, the result being
 an excess of expenditure over receipts
 of Rs. 7504. Advantage has been taken
 of the transfer to the head of budget
 of a large area of cultivable land
 during the year to increase the
 area of forest which has
 extended to 47 square miles.

Latent has been scarce, and, as the
season was a good one, it was
repeated, and ~~the same~~ wheat have
in consequence been, the prices of ~~the~~
the principal food grains have de-
clined, and that to a considerable
extent. In the various districts, the
obvious cause being the deficiency
of communications throughout the dis-
trict which confines cultivators to local
markets for the disposal of their produce.
Wheat has fallen from 4 to 11 rupees
per seer. Rice from 8 to 14 Rs. 0 Annas from
12 to 23 Rs. 0. No. 228 have been granted
as advances for the purchase of seed wheat,
as against No. 10,000 granted in the same
account last year.

2/ The famabandi settlement was
practically completed in all talukas.
The results of the settlement are as under

The large decrease under the head
of land Rev. is due, as the collector
explains, to the redemption for the
first time of large tracts of land nomi-
nally held hitherto by individuals or
associates, & which have been lying
waste since the famine. The auction
sales of disputed lands held in July
1878 were prejudicially affected by
what then appeared to be the gloomy
prospects of the coming season, and
to this cause is due the decrease in
large revenue. The redemption of
4 1/2 lakhs of rupees in account
of arrears of d. Rev. & d. Fund has
been effected by the Rs. 2000 of 5 lakhs
for approval of the course which the
Government has adopted in ~~the settlement~~

refraining from writing this charge
 down off the accounts until he has
~~ascertained~~ ascertained what it will be
 possible to realize from the sale of
 the occupancies of abandoned right
 of way land has been required. When
 revenue paid off to the extent of Rs. 7672
 the cause have been already mentioned.
 The figures for 1880/81 have been sent at a
 increase of Rs. 11,802 or 37 per cent.
 Land Rev. and S. Fund to the amount
 of Rs. 83,802 were expected to be set
 standing as yet July, but the great
 proportion of this was due to the transfer
 of transfer or abandoned right of way
 referred to. Rs. 1,57,479 an amount of
 amount from former years were collected
 in 1879, during the year under review
 and adding this sum to the collections
 made in the same period in respect
 of current year a revenue it appears
 that Rs. 83,802 in excess of the whole
 due for the year was collected,
 which is creditable to the revenue
 officers. The number of notices issued
 (1864) and of cases of distraint (122)
 was not large considering the area
 through which the district has been
 receipts from Provincial S. Fund was
Rs. 1,57,479 a slight increase, while
 Rs. 1,57,479 have declined.
 Forest expenditure has increased from
 Rs. 814 to Rs. 8075, receipts from
 Rs. 2479 to Rs. 1709; the result being
 an excess of expenditure over receipt
 Rs. 7596. Advantage has been taken
 of the transfer to the head of forest
 of a large area of cultivable land
 during the year to increase the
 area of forest which has
 been extended by 47 square miles

In reference to the remarks con-
 tained in his 22nd para the collector
 is probably aware that the
 object of altering the law relating
 to forests is at the present time
 under the consideration of Govt.
 in 1881

Catani has been seen, and, as the
Rosa was a bad one, it was
cheat, and ~~various~~ we have
a measure now, the times of the
the principal firms have de-
clined, and that to a much greater
extent than in adjacent districts, the
obvious cause being the deficiency
of communication throughout the
district which confines cultivators to local
markets for the disposal of their produce.
Wheat has fallen from 4 to 11 rupees
per seer. Dal from 5 to 14 Rs. 0 (now from
12 to 23 Rs. No. 225 have been paid
as Zakat for the purchase of seed wheat,
as against No. 10,000 granted in the same
account last year.

2/ The famabandi settlement was
practically completed in all talukas.
The results of the settlement are as under

The large decrease under the head
of land Rev. is due, as the collector
explains, to the resumption for the
first time of large tracts of land ~~known~~
previously held hitherto by individuals or
absentees, & which have been lying
waste. Since the famabandi settlement
sales of inferior lands held in July
1878 were prejudicially affected by
what then appeared to be the stormy
prospects of the coming season, and
to this cause is due the decrease in
large revenue. The resumption of
4 1/2 lakhs of rupees on account
of arrears of d. Rev. & d. Revenue
sanctioned by G. O. No. 2002 of 54 for
the purpose of the course which the
middleton has adopted in ~~withholding~~

refraining from writing this part
 down off the accounts until he has
~~ascertained~~ ascertained what it will be
 possible to realize from the sale of
 the occupancies of abandoned plots
 whose land has been resumed. When
 revenue paid off to the extent of Rs. 7672.
 The sums have been already mentioned.
 The figures for 1880/81 have been told after
 increase of Rs. 11, 10/- or 37 per cent.
 Land Rev. and S. Funds to the amount
 of Rs. 83,862 were expected to be put
 standing on 31st July, but the great
 proportion of this was due to the transfer
 of transfer or abandoned plots already
 referred to. Rs. 1,57,479 an account of
 arrears from former years were collected
 in 1879/80 during the year under review
 and adding this sum to the collections
 made in the same period an account
 of current year's revenue it appears
 that Rs. 82,616 in excess of the whole
 due - - - for the year was collected.
 which is creditable to the revenue
 officers. The number of cases of disthant (rev.)
 (F&G) found of cases of disthant (rev.)
 was not large considering the crisis
 through which the district has passed.
 Receipts from Municipal & S. Fund had
 also shown a slight increase, while
 those from Taxes have declined.
 Forest Expenditure has increased from
 Rs. 8148 to Rs. 8075, receipts from
 Rs. 2470 to Rs. 1700, the result being
 an excess of expenditure over receipts
 Rs. 704. Advantage has been taken
 of the transfer to the head of forest
 of a large area of cultivated land
 during the year to increase the
 area of forest which has
 been extended by 47 square miles

With reference to the remarks con-
 tained in his 22nd para the Collector
 is probably unaware that the
 subject of altering the law relating
 to forests is at the present time
 under the consideration of Govt.

that it is not easy to determine the
attendance of residents, but some
endeavor should be made to clear
the census as far as possible
the large increase of 25,175 acres
the area of waste land is due to
causes already adverted to the
area of land under cotton cul-
-tivation has increased from 17,240
acres in 1878/79 to 22,266 acres
in 1879/80, and the total cultivated
area is 25,175 as compared
with 5,175 the last year but it is here
that much reliance cannot be
placed upon the accuracy of these
estimates for after all the census
that it is desirable that some effort
should be made to procure more
reliable in Kaladji, a district where
in former years was noted for it. The
climate place seems off in the census
-table with the exception of the
an the subject.

4) 60 out of 104 specimens by
mammals under Act 14 of 1872
were examined by the Collector & 33
by his assistants. Mr. Middleton states
that he discovered he found the
6 cases had been wrongly
-disposed of. He does not enter into
details, and does not mention whether
the error arose from failure of justice,
or merely from want of formality
in procedure. The number of animals
examined & persons convicted shows
a slight increase as compared with
the preceding year. My circumstan-
-tialities will be more fully examined by
you in the J. D. & the public land

There has been a decrease of
in the receipts from Court fees of Rs. 4750
in the receipts from General Stamps, which
is accounted for by a decrease in the
petition in the case, and a decrease
in the number of consequences of cases
in the district. The collector should have
revised the figures for 1878/79 as
else as there for 1878/79 in the table
it is Rs. 25 the para. License Tax, which
went as originally proposed, amounting
to Rs. 75110, which was reduced to
Rs. 69,763 or about 7 per cent. as compared
with the 338, which is 14 per cent.
of the whole number. Very little attention
has been paid to water, the rate
being only Rs. 2 out of 2262, which
has been prepared during the year.
He hoped that next year's report
would show better results.

The collector personally did the
Jamaabandi of the Talukha and per-
formed a fair amount of village
inspection, though he might have
visited more than 21 out of the 1204
villages in the Kaladgi District.
He did not understand how his assistant
could report that his office
was in good order when he
before he had had any opportunity
of examining it. The destruction of
wilderness is much in arrears in
undertaken. Badami or Badalpur.
The only the river in the valley was
learned survey, but was introduced
during the year into a village of
the Badami Talukha. Very few roads
have been opened under the British
Administration. But are some

that it is not easy to ascertain
attendance of respondents, but every
endeavour should be made to clear off
the arrears as soon as possible.
The large increase of 251875 acres in
the area of waste land is due to
sales already advertised to the
area of land under cotton culti-
vation has increased from 18440
acres in 1878/79 to 2,23,664 acres
in 1879/80, and the total arable cultiva-
tion area is 23 lacs as compared
with 5 lacs last year, but it is feared
that much reliance cannot be
placed upon the accuracy of these
estimates. For a few miles the Census
that it is desirable that some efforts
should be made to procure horse-
breeding in Kalandji, a district where
in former years was noted for it. The
should place him off in transmigration
with the Deputy Commissioner
as the subject.

4) 60 out of 104 cases were by
mamelukdars under Act II of 1878
were examined by the Collector & 44
this assistant. The Assistant states
that he discovered the fraud in
6 cases had been working, only
"disposed of". He does not enter into
details, and does not mention whether
the error was from failure of justice
or merely from want of formality
in procedure. The number of cases
or suits or persons convicted shows
a slight increase as compared with
the preceding year. The criminal sta-
tistics will be more fully examined by
Mr. J. D. B. in the past year.

There has been a decrease of Rs. 7521
in the receipts from Court fees of Rs. 470
in the receipts from General Stamp, which
is accounted for by decrease in the
fees in the case, and decrease
in the number of consequences of Court
in the district. The Collector should have
shown the figures for 1870/71 as
well as those for 1871/72 in the table
at the 15th para. License Tax also
went as originally imposed amounting
to Rs. 75210, which ~~was~~ ^{were} reduced to
Rs. 69,763 or about 7 per cent on the
~~license~~ ^{license} 333 ~~patels~~ ^{patels} or Kulkarnis, or 14 per cent
of the whole number, were provided
during the year. Very little attention
has been paid to water regulation.
The only sort of 2262 ~~reflections~~ ^{reflections}
being been prepared during the year.
It is hoped that next year's report
will show better results.

The Collector personally did the
 measurement of the Salukha and pre-
 pared a fair amount of village
 inspection. Hence he might have
 visited more than 21 out of the 1204
 villages in the Kaladji District.
 He is not understood how his Commis-
 sioner could report that his office
 survey was in good order when he
 before he had had any opportunity
 of examining it. The destruction of
 wellsof lands is much in evidence in
 the Salukha. Badami or Badakhsh.
 The only the Salukha Survey was
 the Salukha Survey, but was introduced
 during the year into 11 villages of
 the Badami Salukha. Very few Salukhas
 have been visited under the Salukha
 time settlement. But are aware

5-7
 That it is not easy to secure the
 attendance of residents, but every
 endeavour should be made to clear up
 the areas as soon as possible.
 The large increase of 25167.5 acres in
 the area of waste land is due to
 causes already adverted to. The
 area of land under cotton culti-
 vation has increased from 18440
 acres in 1878/79 to 2,23,664 acres
 in 1879/80, and the total area culti-
 vated is 2.5 lacs as compared
 with 5 lacs last year, but it is feared
 that much reliance cannot be
 placed upon the accuracy of these
 estimates. For a few miles the country
 that it is desirable that some efforts
 should be made to procure more
 breeding in Kaladji, a district which
 in former years was noted for it. He
 should place him off in the same way.
 -tion with the Dept. of the Survey
 on the subject.

4) 60 out of 104 cases were by
 manufacturers under Act II of 1878
 were examined by the Collector & 99
 of his assistants. His conclusion is that
 that he discovered in from 2 to 1.

6 cases had been made, only
 "discovered of". He does not mention whether
 there is, and does not mention whether
 the cases were from the factory & whether
 or were by the way of the factory.
 In the case of the manufacture of
 the cases of the cases considered there
 a slight increase as compared with
 the preceding year. The cases of the
 cases are the more fully examined by
 or in the & the cases of the cases

~~under~~ under s. 15 Cl. 1. O. 189, Act
the 1867. The Dist. Judge should
it have failed to report the manner in
which they discharge their duties.

5) Three meetings of the Dist. L. T.
Committee attended only by officers
were held during the year. The P. W.

receipts were Rs. 1,27,881 including
reimbursement of Rs. 56,755, and ex-
penditure amounted to Rs. 11,824, leaving
closing balance of Rs. 56,274. Of the
expenditure Rs. 4,168 were spent on new
roads, including 4 roads on sides of roads,
~~and~~ a drainage canal. Rs. 1,4015 on establishment and Rs. 18,664
on repairs, & Rs. 2048 on medical charges.
In heading to the 1st col. of the table
in para 55 should be "roads", but
"roads in miles". Whether the figure
4 in the 1st column is meant to
specify that 4 roads new roads were
constructed, or that 4 new miles of road
were constructed, or whether it is not
the planting of road side trees is of
special importance in such a district
as Kaladji, and Mr. have asked
with approval. The ~~various~~ considerable
expenditure in two particulars of the
main body of Bagalkot. H. S.
Pantapa Kumpapa ^{of} the revenue can-

tered in the collector's para of the
importance of the railway from
Bidapur to Gadag may be forwarded

to Bagalkot -

There are 4 Comm. Municipalities in
the district, but no City Municipality.
Their receipts during the year amounted
to Rs. 17,754. of which Rs. 12,181 or 70
per cent were raised by other duties.
of the Subenditure, which amounted
to Rs. 18,664. Rs. 4500 or 23 per cent -

were spent on labor & maintenance, the 300
a 50 per cent on health, and the 2275
a 12 per cent on safety & maintenance,
his numerous offspring, schools in
the district has increased from 14
attended by 5215 pupils, to 148 attended
by 7075 pupils. There is a slight increase
also in the attendance at the air
superior school. 32 schools have been
visited by the Director in person.

6) Mr. S. B. Drake's report is
somewhat meagre, but he appears to
take an interest in his duties. His
first examination of the Colaba Khar
at Madras cannot have been thorough
as he completed it in 3 days. His
inspection of the Khar was suffi-
cient, but some boundary work
ought to have been examined, & the
condition of the old Khar was found
no reason for neglecting this duty.

~~Mr. Drake~~ ^{He} appears to be inclined to
~~that~~ ^{the} village officers with
indifferent preference, recently the
Director's attention should be called
to the fact, Mr. Drake deserves to be
commended for the interest shown by
him in the progress of education in
his charge.

Mr. Curran's duties during the
year have been heavy, but he
has carefully attended to boundary
advice except as regards boundary
-work inspection, which was in-
sufficient. His report does not contain
much matter of interest.

The Kalukha reported on the
Shrawas Balaji Dist. C. C. M.
were during the greater part of the

under S. 15-Cl. 1. B. has dep.
the of 1867. The Dist. Comptroller should
not have failed to report the manner in
which they discharge their duties.

5) Three meetings of the Dist. d. l.
Committee, attended only by official
were held during the year. The P. W.
Receipts were Rs. 1,27,881, including
the receipt of Rs. 56,755, and expen-
-diture assigned to Rs. 11,124, leaving
a closing balance of Rs. 56,274. Of the
expenditure Rs. 4,115 were spent on new
roads, including 4 roads or miles of roads,
from the 2 drainage drains, 1 each, Rs.
14,015 on establishment, and Rs. 1,864
on repairs & Rs. 2046 on medical charges.
The heading to the 1st col. of the table
at para 55 should be not "roads", but
"roads in miles". Whether the figure
in the 1st column is meant to
specify that 4 roads new roads were
constructed, or that 4 new miles of road
were constructed there is nothing to show.
The planting of road side trees is of
special importance in such a district
as Kaladgi, and Dist. have taken
with approval the ~~various~~ laudable
exertions in two particulars of the
municipalities of Bagalkot, H. S.
Pantapa Nanapa. ^{copy of} The remarks con-
-tained in the collector's para 5 of a

Administration Reports.

No.

4757

REVENUE DEPARTMENT.

Bombay Castle, September 1880.

Letter from the Commissioner, S. D., No. 1746, dated 5th August 1880—Submitting, with his remarks, the Administration Reports of the Collector of Kaládgi and his Assistants and the District Deputy Collector for 1879-80.

RESOLUTION.—Mr. Middleton has been in charge of the Kaládgi Collectorate throughout the year, but there have unfortunately been several unavoidable changes among the staff of Assistant Collectors. The season was on the whole a favourable one. The depredations of rats which prevailed to a formidable extent during the earlier part of the monsoon were at last effectually checked, partly by the cold and damp and partly by the vigorous measures which were undertaken to suppress them. More than 4 million rats were destroyed between the middle of July and the end of November. The consequence was that, as the rainfall was seasonable, the early crops were fair and the late crops were good. Rural population decreased by 35,539. The great preponderance of deaths over births, as exhibited in the Collector's 5th para., shows how defective birth registration is in Kaládgi. The recorded birth-rate is only 3.9 per mille. Public health during the year was good. What is popularly known as the famine ulcer, though it has not altogether disappeared, was much less prevalent than in 1878-79. The attendance of out-patients at dispensaries has increased from 12,751 to 13,158. The number of vaccine operations has again declined. Agricultural stock shows an increase under every head except "carts", the number of horned cattle having risen from 1,94,551 to 2,12,132 and of sheep and goats from 2,36,212 to 2,45,029. Labour has been scarce, and, as the season was a good one, it was in request, and wages have in consequence risen. The prices of the principal food-grains have declined, and that to a much greater extent than in adjacent districts, the obvious cause being the deficiency of communications throughout the district which confines cultivators to local markets for the disposal of their produce. Wheat has fallen from 4 to 11 sers per rupee, dal from 5 to 14 sers and jowári from 12 to 23 sers. Rs. 5,393 have been granted as takávi for the purchase of seed and cattle as against Rs. 10,840 granted on the same account last year.

2. The Jamábandi settlement was punctually completed in all talukas. The results of the settlement are as under:—

	1878-79.	1879-80.	Increase.	Decrease.
	Rs.	Rs.		Rs.
Land Revenue for collection	12,92,192	12,12,136	...	80,056
Sayer do do	40,884	32,081	...	8,803
Local Fund do	1,12,442	1,07,410	...	4,932
	14,45,518	13,51,627	...	93,791

The large decrease under the head of Land Revenue is due, as the Collector explains, to the resumption for the first time of large tracts of land nominally held hitherto by insolvents or absentees, and which have been lying waste since the famine. The auction sales of liquor farms held in July 1879 were prejudicially affected by what then appeared to be the gloomy prospects of the coming season, and to this cause is due the decrease in Sayer Revenue. The remission of 4½ lakhs of rupees on account of arrears of Land Revenue and Local Funds

year under Mr Kalkreuth's
directions. He & Co. had
~~often~~ turned actively about his
charge, but his boundary mark
inspection was very inefficient,
as was also his examination of
records from the table at hand 13 of
the report it would appear that
the Colville Accounts of both Indian
Sundis were each examined in one
day. It is presumed that this
cannot have been so, but as the
Comr. professedly observes, the accounts
first taken of the accounts of
Sundis are not to have been
continued till 26th Reg.

Administration Reports.

No. *4757*

REVENUE DEPARTMENT.

Bombay Castle, September 1880.

Letter from the Commissioner, S. D., No. 1746, dated 5th August 1880—Submitting, with his remarks, the Administration Reports of the Collector of Kaládgi and his Assistants and the District Deputy Collector for 1879-80.

RESOLUTION.—Mr. Middleton has been in charge of the Kaládgi Collectorate throughout the year, but there have unfortunately been several unavoidable changes among the staff of Assistant Collectors. The season was on the whole a favourable one. The depredations of rats which prevailed to a formidable extent during the earlier part of the monsoon were at last effectually checked, partly by the cold and damp and partly by the vigorous measures which were undertaken to suppress them. More than 4 million rats were destroyed between the middle of July and the end of November. The consequence was that, as the rainfall was seasonable, the early crops were fair and the late crops were good. Rural population decreased by 35,539. The great preponderance of deaths over births, as exhibited in the Collector's 5th para., shows how defective birth registration is in Kaládgi. The recorded birth-rate is only 9.9 per mille. Public health during the year was good. What is popularly known as the famine ulcer, though it has not altogether disappeared, was much less prevalent than in 1878-79. The attendance of out-patients at dispensaries has increased from 12,751 to 13,158. The number of vaccine operations has again declined. Agricultural stock shows an increase under every head except "carts", the number of horned cattle having risen from 1,94,551 to 2,12,132 and of sheep and goats from 2,26,212 to 2,45,029. Labour has been scarce, and, as the season was a good one, it was in request, and wages have in consequence risen. The prices of the principal food-grains have declined, and that to a much greater extent than in adjacent districts, the obvious cause being the deficiency of communications throughout the district which confines cultivators to local markets for the disposal of their produce. Wheat has fallen from 4 to 11 sers per rupee, dal from 5 to 14 sers and jawári from 12 to 23 sers. Rs. 3,393 have been granted as tukávi for the purchase of seed and cattle as against Rs. 10,840 granted on the same account last year.

2. The Jamábandi settlement was punctually completed in all talukas. The results of the settlement are as under:—

	1878-79	1879-80.	Increase.	Decrease.
	Rs.	Rs.		Rs.
Land Revenue for collection	12,92,192	12,12,136	...	80,056
Sayeri do	49,884	32,081	...	8,803
Local Funds do	1,12,332	1,07,410	...	4,932
	14,44,408	13,51,627	...	93,791

The large decrease under the head of Land Revenue is due, as the Collector explains, to the reclamation for the first time of large tracts of land nominally held hitherto by tenants or absentees, and which have been lying waste since the famine. The auction sales of liquor farms held in July 1879 were prejudicially affected by what then appeared to be the gloomy prospects of the coming season, and this decrease is due to the decrease in Sayeri Revenue. The remission of 1½ lakhs of rupees on account of arrears of Land Revenue and Local Funds

year under Mr. Kalkreuth
George West. Dr. Co. West
offered himself actively about his
charge, but his knowledge - work.
inspection was very inefficient
as was also his ^{inspection} examination of
schools. From the table at para 13 of
the report it would appear that
the Saluka Accounts of the Indian
Society were last examined in the
day. It is presumed that this
cannot have been so - but, as the
Commissioner properly observes, the accounts
first taken of the accounts of
Society are not to have been
submitted till 26th Sept.

Administration Reports.

No. **4757**

REVENUE DEPARTMENT.

Bombay Castle, September 1880.

Letter from the Commissioner, S. D., No. 1746, dated 5th August 1880—Submitting, with his remarks, the Administration Reports of the Collector of Kaládgi and his Assistants and the District Deputy Collector for 1879-80.

RESOLUTION.—Mr. Middleton has been in charge of the Kaládgi Collectorate throughout the year, but there have unfortunately been several unavoidable changes among the staff of Assistant Collectors. The season was on the whole a favourable one. The depredations of rats which prevailed to a formidable extent during the earlier part of the monsoon were at last effectually checked, partly by the cold and damp and partly by the vigorous measures which were undertaken to suppress them. More than 4 million rats were destroyed between the middle of July and the end of November. The consequence was that, as the rainfall was seasonable, the early crops were fair and the late crops were good. Rural population decreased by 35,539. The great preponderance of deaths over births, as exhibited in the Collector's 5th para., shows how defective birth registration is in Kaládgi. The recorded birth-rate is only 9.9 per mille. Public health during the year was good. What is popularly known as the famine ulcer, though not altogether disappeared, was much less prevalent than in 1878-79. The attendance of out-patients at dispensaries has increased from 12,751 to 13,153. The number of vaccine operations has again declined. Agricultural stock shows an increase under every head except "carts", the number of horned cattle having risen from 1,94,551 to 2,12,132 and of sheep and goats from 2,36,212 to 2,45,029. Labour has been scarce, and, as the season was a good one, it was in request, and wages have in consequence risen. The prices of the principal food-grains have declined, and that to a much greater extent than in adjacent districts, the obvious cause being the deficiency of communication throughout the district which confines cultivators to local markets for the disposal of their produce. Wheat has fallen from 1 to 11 sers per rupee, dal from 5 to 14 sers and jowári from 12 to 23 sers. Rs. 3,394 have been granted as takávi for the purchase of seed and cattle as against Rs. 19,840 granted on the same account last year.

2. The Jundeh settlement was punctually completed in all talukas. The results of the settlement are as under:—

	1879-80	1880-81	Increase.	Decrease.
	Rs.	Rs.		Rs.
Land Revenue	12,02,102	12,12,136		80,056
Land Revenue	1,00,000	52,081		8,003
Land Revenue	1,12,000	1,06,400		4,932
	13,14,102	13,70,617		94,791

The following is a summary of the results of the settlement, as the Collector has submitted to the Government. The settlement was completed in all talukas. The results of the settlement are as under:—

was sanctioned by Government Resolution No. 2002 of 9th June. Government approve of the course which Mr. Middleton has adopted in refraining from writing this large sum off the accounts until he has ascertained what it will be possible to realize from the sale of the occupancies of ryots whose land has been resumed. Abkari Revenue fell off to the extent of Rs. 7,679. The cause has been already mentioned. The farms for 1880-81 have been sold at an increase of Rs. 11,852 or 37 per cent. Land Revenue and Local Funds to the amount of Rs. 93,862 were expected to be outstanding on 31st July, but the great proportion of this was due on the lands of pauper or absconded ryots already referred to. Rs. 1,57,479 on account of arrears from former years were collected during the year under review, and adding this sum to the collections made in the same period on account of current year's revenue it appears that Rs. 63,616 in excess of the whole demand for the year was collected, which is creditable to the Revenue Officers. The number of notices issued (8,641) and of cases of distraint (222) was not large considering the crisis through which the district has passed. Receipts from Provincial and Local Fund Road Tolls show a slight increase, while those from Ferries have declined. With reference to the remarks contained in his 23rd para, the Collector is probably now aware that the subject of altering the law relating to poisons is at the present time under the consideration of Government in the Judicial Department. Forest expenditure has increased from Rs. 6,148 to Rs. 9,973 and receipts have decreased from Rs. 2,473 to Rs. 1,709, the net result being an excess of expenditure over receipts of Rs. 7,364. Advantage has been taken of the transfer to the head of waste of a large area of cultivable land during the year to increase the area under forest which has been extended by 47 square miles. There has been a decrease of Rs. 7,321 in the receipts from Court Fee and of Rs. 4,753 in the receipts from General Stamps, which is accounted for by diminished litigation in the one case and a decrease in the number of conveyances of land in the other. The Collector should have shown the figures for 1878-79 as well as those for 1879-80 in the table at his 25th para. License Tax assessment as originally imposed amounted to Rs. 75,210, which were reduced to Rs. 69,763 or about 7 per cent. on appeal. 293 Revenue Patels and Kulkarnis or over 12 per cent. of the whole number were punished during the year. Very little attention has been paid to watan registration, only 80 out of 2,262 registers having been prepared during the year. It is hoped that next year's report will show better results.

3. The Collector personally did the Jamabandi of two talukas and performed a fair amount of village inspection, though he might have visited more than 21 out of the 1,204 villages in the Kaladgi District. It is not understood how Mr. Cumine could report that his office library was in good order before he had had any opportunity of examining it. The destruction of useless records is much in arrears in Mudelihal, Badami and Bagalkot. Revised survey rates were introduced during the year into eleven villages of the Badami Taluka. Very few sanads have been issued under the Alienation Settlement. Government are aware that it is not easy to secure the attendance of recipients, but every endeavour should be made to clear off the arrears as soon as possible. The large increase of 2,51,675 acres in the area of waste land is due to causes already adverted to. The area of land under cotton cultivation has increased from 1,62,402 acres in 1878-79 to 2,23,664 acres in 1879-80, and the estimated outturn per acre is 23 lbs. as compared with 5 lbs. last year, but it is feared that much reliance cannot be placed upon the accuracy of this estimate. Government agree with the Commissioner that it is desirable that some efforts should be made to promote horse-breeding in Kaladgi, a district which in former years was noted for it. He should place himself in communication with the Inspecting Veterinary Surgeon on the subject.

4. 60 out of 104 decisions by Mamlatdars under Act III. of 1876 were examined by the Collector and 99 by his Assistants. Mr. Middleton states that he found that "6 cases had been unsatisfactorily disposed of." He does not enter into details, and does not mention whether the errors arose from failure of justice, or merely from want of formality in procedure. The numbers of crimes committed and persons convicted show a slight increase as compared with the preceding year. The criminal statistics will be more fully examined by Government in the Judicial Department. Six Police Patels held commissions under Section 15,

Clause 1, Bombay Act VIII. of 1867. The District Magistrate should not have failed to report the manner in which they discharge their duties.

5. Three meetings of the District Local Fund Committee, attended only by officials, were held during the year. The Public Works receipts were Rs. 1,37,998 including an opening balance of Rs. 58,759, and expenditure amounted to Rs. 81,624, leaving a closing balance of Rs. 56,374. Of the expenditure Rs. 41,158 were spent on new works, including 4 "roads", 2 dharmshalas and 1 tank, Rs. 14,815 on establishment, Rs. 18,664 on repairs and Rs. 3,046 on medical charges. The heading to the 1st column of the table at para. 53 should be, not "roads", but "roads in miles". Whether the figure 4 in the 1st column is meant to specify that 4 new roads or that 4 new miles of road were constructed there is nothing to show. The planting of road-side trees is of special importance in such a district as Kaladgi, and Government have noticed with approval the laudable exertions in this particular of the Mamlatdar of Bagalkot, Rao Sahib Santipa Rangappa. ~~Copy of the remarks contained in the Collector's para. 55 on the importance of the railway from Shirdpur to Gadag and of a line of telegraph to Bagalkot may be forwarded to the Public Works Department for consideration.~~ There are 4 Town Municipalities in the district, but no City Municipality. Their receipts during the year amounted to Rs. 17,756, of which Rs. 12,181 or over 68 per cent. were raised by Octroi duties. Of the expenditure, which amounted to Rs. 13,869, Rs. 4,503 or 23 per cent. were spent on establishment, Rs. 9,656 or 51 per cent. on health, and Rs. 2,273 or 12 per cent. on safety and convenience. The number of primary schools in the district has increased from 140 attended by 5,215 pupils to 146 attended by 7,073 pupils. There is a slight increase also in the attendance at the one superior school. 32 schools have been visited by the Collector in person.

6. Mr. S. B. Thakur's report is somewhat meagre, but he appears to take an interest in his duties. His first examination of the taluka kacheri at Badami cannot have been thorough, as he completed it in 3 days. His village inspection generally was sufficient, but more boundary-marks ought to have been examined, and the condition of the old survey maps furnishes no reason for neglecting this duty. He appears to be inclined to punish village officers with indiscreet frequency and severity, and the Collector's attention should be called to the fact. Mr. Thakur deserves to be commended for the interest shown by him in the progress of education in his charge.

Mr. Cumine's duties during the year have been heavy, but he has carefully attended to standing orders, except as regards boundary-mark inspection, which was insufficient. His report does not contain much matter of interest.

The talukas reported on by Mr. Shrinivas Balkaji, District Deputy Collector, were during the greater part of the year under Mr. Balkrishna Deorao, District Deputy Collector. That officer moved actively about his charge, but his boundary-mark inspection was very insufficient, as was also his inspection of schools. From the table at para. 13 of the report it would appear that the taluka accounts of Indri and Sindgi were each examined in one day. It is presumed that this cannot have been so; but, as the Commissioner properly observes, the first examination of the accounts of Sindgi ought not to have been postponed till 26th February.

Acting Secretary to Government.

To

was sanctioned by Government Resolution No. 2002 of 9th June. Government approve of the course which Mr. Middleton has adopted in refraining from writing this large sum off the accounts until he has ascertained what it will be possible to realize from the sale of the occupancies of ryots whose land has been resumed. Abkari Revenue fell off to the extent of Rs. 7,679. The cause has been already mentioned. The farms for 1880-81 have been sold at an increase of Rs. 11,852 or 37 per cent. Land Revenue and Local Funds to the amount of Rs. 93,862 were expected to be outstanding on 31st July, but the great proportion of this was due on the lands of pauper or absconded ryots already referred to. Rs. 1,57,479 on account of arrears from former years were collected during the year under review, and adding this sum to the collections made in the same period on account of current year's revenue it appears that Rs. 63,616 in excess of the whole demand for the year was collected, which is creditable to the Revenue Officers. The number of notices issued (8,611) and of cases of distraint (222) was not large considering the crisis through which the district has passed. Receipts from Provincial and Local Fund Road Tolls show a slight increase, while those from Ferries have declined. With reference to the remarks contained in his 23rd para, the Collector is probably now aware that the subject of altering the law relating to poisons is at the present time under the consideration of Government in the Judicial Department. Forest expenditure has increased from Rs. 8,148 to Rs. 9,973 and receipts have decreased from Rs. 2,478 to Rs. 1,709, the net result being an excess of expenditure over receipts of Rs. 7,364. Advantage has been taken of the transfer to the head of waste of a large area of cultivable land during the year to increase the area under forest which has been extended by 47 square miles. There has been a decrease of Rs. 7,321 in the receipts from Court Fee and of Rs. 4,753 in the receipts from General Stamps, which is accounted for by diminished litigation in the one case and a decrease in the number of conveyances of land in the other. The Collector should have shown the figures for 1878-79 as well as those for 1879-80 in the table at his 25th para. License Tax assessment as originally imposed amounted to Rs. 75,210, which were reduced to Rs. 69,763 or about 7 per cent. on appeal. 293 Revenue Patels and Kulkarnis or over 12 per cent. of the whole number were punished during the year. Very little attention has been paid to watan registration, only 80 out of 2,262 registers having been prepared during the year. It is hoped that next year's report will show better results.

3. The Collector personally did the Jamabandi of two talukas and performed a fair amount of village inspection, though he might have visited more than 21 out of the 1,204 villages in the Kalkdgi District. It is not understood how Mr. Cumine could report that his office library was in good order before he had had any opportunity of examining it. The destruction of useless records is much in arrears in Madhibhal, Badami and Bagalkot. Revised survey rates were introduced during the year into eleven villages of the Badami Taluka. Very few sanads have been issued under the Alienation Settlement. Government are aware that it is not easy to secure the attendance of recipients, but every endeavour should be made to clear off the arrears as soon as possible. The large increase of 2,51,675 acres in the area of waste land is due to causes already alluded to. The area of land under cotton cultivation has increased from 1,62,492 acres in 1878-79 to 2,23,664 acres in 1879-80, and the estimated outturn per acre is 23 lbs. as compared with 5 lbs. last year, but it is feared that much reliance cannot be placed upon the accuracy of this estimate. Government agree with the Commissioner that it is desirable that some efforts should be made to promote horse-breeding in Kalkdgi, a district which in former years was noted for it. He should place himself in communication with the Inspecting Veterinary Surgeon on the subject.

4. 60 out of 101 decisions by Mamlatdars under Act III. of 1876 were examined by the Collector and 99 by his Assistants. Mr. Middleton states that he found that "6 cases had been unsatisfactorily disposed of." He does not enter into details, and does not mention whether the errors arose from failure of justice, or merely from want of formality in procedure. The numbers of crimes committed and persons convicted show a slight increase as compared with the preceding year. The criminal statistics will be more fully examined by Government in the Judicial Department. Six Police Patels held commissions under Section 15.

Clause 1, Bombay Act VIII. of 1867. The District Magistrate should not have failed to report the manner in which they discharge their duties.

5. Three meetings of the District Local Fund Committee, attended only by officials, were held during the year. The Public Works receipts were Rs. 1,37,998 including an opening balance of Rs. 58,759, and expenditure amounted to Rs. 81,624, leaving a closing balance of Rs. 56,374. Of the expenditure Rs. 41,158 were spent on new works, including 4 "roads", 2 dharmshālas and 1 tank, Rs. 14,815 on establishment, Rs. 18,664 on repairs and Rs. 3,040 on medical charges. The heading to the 1st column of the table at para 53 should be, not "roads", but "roads in miles". Whether the figure 4 in the 1st column is meant to specify that 4 new roads or that 4 new miles of road were constructed there is nothing to show. The planting of road-side trees is of special importance in such a district as Kaladgi, and Government have noticed with approval the laudable exertions in this particular of the Mamlatdār of Bāgalkot, Rāo Sāhob Santipā Rangapa. ~~Copy of the remarks contained in the Collector's para. 50 on the importance of the railway from Sholapur to Gadag and of a line of telegraph to Bāgalkot may be forwarded to the Public Works Department for consideration.~~ There are 4 Town Municipalities in the district, but no City Municipality. Their receipts during the year amounted to Rs. 17,756, of which Rs. 12,181 or over 68 per cent. were raised by Octroi duties. Of the expenditure, which amounted to Rs. 13,869, Rs. 4,503 or 23 per cent. were spent on establishment, Rs. 9,656 or 51 per cent. on health, and Rs. 2,273 or 12 per cent. on safety and convenience. The number of primary schools in the district has increased from 140 attended by 5,215 pupils to 146 attended by 7,073 pupils. There is a slight increase also in the attendance at the one superior school. 32 schools have been visited by the Collector in person.

6. Mr. S. B. Thākur's report is somewhat meagre, but he appears to take an interest in his duties. His first examination of the taluka kacheri at Badāmi cannot have been thorough, as he completed it in 3 days. His village inspection generally was sufficient, but more boundary-marks ought to have been examined, and the condition of the old survey maps furnishes no reason for neglecting this duty. He appears to be inclined to punish village officers with in discreet frequency and severity, and the Collector's attention should be called to the fact. Mr. Thākur deserves to be commended for the interest shown by him in the progress of education in his charge.

Mr. Camino's duties during the year have been heavy, but he has carefully attended to standing orders except as regards boundary-mark inspection, which was insufficient. His report does not contain much matter of interest.

The talukas reported on by Mr. Shrinivās Bālāji, District Deputy Collector, were during the greater part of the year under Mr. Bālkrishna Deorao, District Deputy Collector. That officer moved actively about his charge, but his boundary-mark inspection was very insufficient, as was also his inspection of schools. From the table at para. 13 of the report it would appear that the taluka accounts of Indur and Sindgi were each examined in one day. It is presumed that this cannot have been so; but, as the Commissioner properly observes, the first examination of the accounts of Sindgi ought not to have been postponed till 26th February.

was sanctioned by Government Resolution No. 2602 of 9th June. Government approve of the course which Mr. Middleton has adopted in refraining from writing off this large sum off the accounts until he has ascertained what it will be possible to realize from the sale of the occupancies of ryots whose land has been resumed. Abkiri Revenue fell off to the extent of Rs. 7,679. The cause has been already mentioned. The farms for 1880-81 have been sold at an increase of Rs. 11,852 or 37 per cent. Land Revenue and Local Funds to the amount of Rs. 93,862 were expected to be outstanding on 31st July, but the great proportion of this was due on the lands of pauper or absconded ryots already referred to. Rs. 1,57,479 on account of arrears from former years were collected during the year under review, and adding this sum to the collections made in the same period on account of current year's revenue it appears that Rs. 63,616 in excess of the whole demand for the year was collected, which is creditable to the Revenue Officers. The number of notices issued (8,641) and of cases of distraint (222) was not large considering the crisis through which the district has passed. Receipts from Provincial and Local Fund Road Tolls show a slight increase, while those from Ferries have declined. With reference to the remarks contained in his 23rd para, the Collector is probably now aware that the subject of altering the law relating to poisons is at the present time under the consideration of Government in the Judicial Department. Forest expenditure has increased from Rs. 8,148 to Rs. 9,973 and receipts have decreased from Rs. 2,478 to Rs. 1,709, the net result being an excess of expenditure over receipts of Rs. 7,364. Advantage has been taken of the transfer to the head of waste of a large area of cultivable land during the year to increase the area under forest which has been extended by 47 square miles. There has been a decrease of Rs. 7,321 in the receipts from Court Fee and of Rs. 4,753 in the receipts from General Stamps, which is accounted for by diminished litigation in the one case and a decrease in the number of conveyances of land in the other. The Collector should have shown the figures for 1878-79 as well as those for 1879-80 in the table at his 25th para. License Tax assessment as originally imposed amounted to Rs. 75,210, which were reduced to Rs. 69,763 or about 7 per cent. on appeal. 234 Revenue Patels and Kulkarnis or over 12 per cent. of the whole number were punished during the year. Very little attention has been paid to watan registration, only 80 out of 2,262 registers having been prepared during the year. It is hoped that next year's report will show better results.

3. The Collector personally did the Jamabandi of two talukas and performed a fair amount of village inspection, though he might have visited more than 21 out of the 1,204 villages in the Kaladgi District. It is not understood how Mr. Curzons could report that his office library was in good order before he had had any opportunity of examining it. The destruction of useless records is much in arrears in Mudcoihál, Badámi and Bágalkot. Revised survey rates were introduced during the year into eleven villages of the Badámi Taluka. Very few sanads have been issued under the Alienation Settlement. Government are aware that it is not easy to secure the attendance of recipients, but every endeavour should be made to clear off the arrears as soon as possible. The large increase of 2,51,675 acres in the area of waste land is due to causes already adverted to. The area of land under cotton cultivation has increased from 1,62,492 acres in 1878-79 to 2,23,664 acres in 1879-80, and the estimated outturn per acre is 23 lbs. as compared with 5 lbs. last year, but it is feared that much reliance cannot be placed upon the accuracy of this estimate. Government agree with the Commissioner that it is desirable that some efforts should be made to promote horse breeding in Kaladgi, a district which in former years was noted for it. He should place himself in communication with the Inspecting Veterinary Surgeon on the subject.

4. 60 out of 104 decisions by Mámlatdárs under Act III. of 1876 were examined by the Collector and 99 by his Assistants. Mr. Middleton states that he found that "6 cases had been unsatisfactorily disposed of." He does not enter into details, and does not mention whether the errors arose from failure of justice, or merely from want of formality in procedure. The numbers of crimes committed and persons convicted show a slight increase as compared with the preceding year. The criminal statistics will be more fully examined by Government in the Judicial Department. Six Police Patels held commissions under Section 15.

Clause 1, Bombay Act VIII. of 1867. The District Magistrate should not have failed to report the manner in which they discharge their duties.

5. Three meetings of the District Local Fund Committee, attended only by officials, were held during the year. The Public Works receipts were Rs. 1,37,998 including an opening balance of Rs. 58,759, and expenditure amounted to Rs. 81,624, leaving a closing balance of Rs. 56,374. Of the expenditure Rs. 41,158 were spent on new works, including 4 "roads", 2 dharnishahis and 1 tank, Rs. 14,815 on establishment, Rs. 18,964 on repairs and Rs. 3,046 on medical charges. The heading to the 1st column of the table at para. 5b should be, not "roads", but "roads in miles". Whether the figure 4 in the 1st column is meant to specify that 4 new roads or that 4 new miles of road were constructed there is nothing to show. The planting of road-side trees is of special importance in such a district as Kaladgi, and Government have noticed with approval the laudable exertions in this particular of the Mamlatdar of Bagalkot, Rao Sahob Santappa Rangipia. ~~Copies of the remarks contained in the Collector's para. 5b on the importance of the railway from Sholapur to Gadag and of a line of telegraph to Bagalkot may be forwarded to the Public Works Department for consultation.~~ There are 4 Town Municipalities in the district, but no City Municipality. Their receipts during the year amounted to Rs. 17,756, of which Rs. 12,181 or over 64 per cent. were raised by Octroi duties. Of the expenditure, which amounted to Rs. 13,469, Rs. 4,503 or 23 per cent. were spent on establishment, Rs. 9,656 or 51 per cent. on health, and Rs. 2,273 or 12 per cent. on safety and convenience. The number of primary schools in the district has increased from 149 attended by 5,215 pupils to 146 attended by 7,073 pupils. There is a slight increase also in the attendance at the one superior school. 92 schools have been visited by the Collector in person.

6. Mr. S. B. Thakur's report is somewhat meagre, but he appears to take an interest in his duties. His first examination of the taluka kachori at Badami cannot have been thorough, as he completed it in 3 days. His village inspection generally was sufficient, but more boundary-marks ought to have been examined, and the condition of the old survey maps furnishes no reason for neglecting this duty. He appears to be inclined to punish village officers with fines for every offence, and the Collector's attention should be called to this fact. Mr. Thakur deserves to be commended for the interest shown by him in the progress of education in his charge.

Mr. Cumt's duties during the year have been heavy, but he has carefully attended to standing orders except as regards boundary-mark inspection, which was not sufficient. His report does not contain much matter of interest.

The talukas reported on by Mr. Shrawas Babji, District Deputy Collector, were during the year under Mr. Badkrishna Deorao, District Deputy Collector. That officer moved actively about his charge, but his boundary-mark inspection was very insufficient, as was also his inspection of schools. From the table at para. 13 of the report it would appear that the taluka accounts of Badami and Sindagi were each examined in one day. It is presumed that this entry was not correct, but as the Commissioner properly observes, the first examination of the accounts of Sindagi ought not to have been postponed till 26th February.

Administration Reports.

No. 4757.

REVENUE DEPARTMENT.

Bombay Castle, 9th September 1880.

Letter from the Commissioner, S. D., No. 1746, dated 5th August 1880.—Submitting, with his remarks, the Administration Reports of the Collector of Kaládgi and his Assistants and the District Deputy Collector for 1879-80.

RESOLUTION.—Mr. Middleton has been in charge of the Kaládgi Collector's office throughout the year, but there have unfortunately been several unavoidable changes among the staff of Assistant Collectors. The season was on the whole a favourable one. The depredations of rats which prevailed to a formidable extent during the earlier part of the monsoon were at last effectually checked, partly by the cold and damp and partly by the vigorous measures which were undertaken to suppress them. More than 4 million rats were destroyed between the middle of July and the end of November. The consequence was that, as the rainfall was seasonable, the early crops were fair and the late crops were good. Rural population decreased by 35,539. The great preponderance of deaths over births, as exhibited in the Collector's 5th para., shows how defective birth registration is in Kaládgi. The recorded birth-rate is only 9.2 per mille. Public health during the year was good. What is popularly known as the famine-plague, though it has not altogether disappeared, was much less prevalent than in 1878-79. The attendance of out-patients at dispensaries has increased from 12,751 to 12,153. The number of vaccine operations has again declined. Agricultural stock shows an increase under every head except "carts", the number of horned cattle having risen from 1,94,551 to 2,12,132 and of sheep and goats from 2,36,212 to 2,45,029. Labour has been scarce, and, as the season was a good one, it was in request, and wages have in consequence risen. The prices of the principal food-grains have declined, and that to a much greater extent than in adjacent districts, the obvious cause being the deficiency of communications throughout the district which confines cultivators to local markets for the disposal of their produce. Wheat has fallen from 4 to 11 sers per rupee, dal from 5 to 14 sers and jowári from 12 to 23 sers. Rs. 3,393 have been granted as takávi for the purchase of seed and cattle as against Rs. 10,840 granted on the same account last year.

2. The jamábandi settlement was punctually completed in all talukas. The results of the settlement are as under:—

		1878-79.	1879-80.	Increase.	Decrease.
		Rs.	Rs.		Rs.
Land Revenue for collection	...	12,92,102	12,12,136	...	50,056
Sayer do. do.	..	40,884	32,081	...	8,803
Local Fund do. ..	..	1,12,342	1,07,410	...	4,932
		14,45,418	13,51,627	...	93,791

The large decrease under the head of Land Revenue is due, as the Collector explains, to the resumption for the first time of large tracts of land nominally held hitherto by insolvents or absentees, and which have been lying waste since the famine. The auction sales of liquor farms held in July 1879 were prejudicially affected by what then appeared to be the gloomy prospects of the coming season, and to this cause is due the decrease in Sayer Revenue. The remission of $1\frac{1}{2}$ lakhs of rupees on account of arrears of Land Revenue and Local Funds

Re pass 5-

5X The Collector refers to the previous
want of railway & telegraphic commu-
nication, which does not cease to attract

Administration Reports.

No. 4757.

REVENUE DEPARTMENT.

Bombay Castle, 9th September 1880.

Letter from the Commissioner, S. D., No. 1746, dated 5th August 1880.—Submitting, with his remarks, the Administration Reports of the Collector of Kaládgi and his Assistants and the District Deputy Collector for 1879-80.

RESOLUTION.—Mr. Middleton has been in charge of the Kaládgi Collectorate throughout the year, but there have unfortunately been several unavoidable changes among the staff of Assistant Collectors. The season was on the whole a favourable one. The depredations of rats which prevailed to a formidable extent during the earlier part of the monsoon were at last effectually checked, partly by the cold and damp and partly by the vigorous measures which were undertaken to suppress them. More than 4 million rats were destroyed between the middle of July and the end of November. The consequence was that, as the rainfall was seasonable, the early crops were fair and the late crops were good. Rural population decreased by 35,539. The great preponderance of deaths over births, as exhibited in the Collector's 5th para., shows how defective birth registration is in Kaládgi. The recorded birth-rate is only 9.9 per mille. Public health during the year was good. What is popularly known as the famine ulcer, though it has not altogether disappeared, was much less prevalent than in 1878-79. The attendance of out-patients at dispensaries has increased from 12,751 to 13,153. The number of vaccine operations has again declined. Agricultural stock shows an increase under every head except "carts", the number of horned cattle having risen from 1,94,551 to 2,12,132 and of sheep and goats from 2,36,212 to 2,45,029. Labour has been scarce, and, as the season was a good one, it was in request, and wages have in consequence risen. The prices of the principal food-grains have declined, and that to a much greater extent than in adjacent districts, the obvious cause being the deficiency of communications throughout the district which confines cultivators to local markets for the disposal of their produce. Wheat has fallen from 4 to 11 sers per rupee, dal from 5 to 14 sers and jowári from 12 to 23 sers. Rs. 3,393 have been granted as takávi for the purchase of seed and cattle as against Rs. 10,840 granted on the same account last year.

2. The jamábandi settlement was punctually completed in all talukas. The results of the settlement are as under:—

	1878-79	1879-80	Increase.	Decrease.
	Rs	Rs		Rs
Land Revenue for collection ..	12,92,192	12,12,136	...	80,056
Sayer do do ..	40,884	32,081	...	8,803
Local Fund do ..	1,12,342	1,07,419	...	4,922
	14,45,418	13,51,627	...	93,791

The large decrease under the head of Land Revenue is due, as the Collector explains, to the resumption for the first time of large tracts of land nominally held hitherto by insolvents or absentees, and which have been lying waste since the famine. The auction sales of liquor farms held in July 1879 were pre-eminently affected by what then appeared to be the gloomy prospects of the coming season, and to this cause is due the decrease in Sayer Revenue. The remission of 1½ lakhs of rupees on account of arrears of Land Revenue and Local Funds

Administration Reports.

No. 4757.

REVENUE DEPARTMENT.

Pombury Castle, 9th September 1880.

Letter from the Commissioner, S.D., No. 1746, dated 5th August 1880—Submitting, with his remarks, the Administration Report of the Collector of Kaládgi and his Assistants and the District Deputy Collector for 1879-80.

RESOLUTION.—Mr. Middleton has been in charge of the Kaladgi Collectorate throughout the year, but there have unfortunately been several unavoidable changes among the staff of Assistant Collectors. The season was on the whole a favourable one. The depredations of rats which prevailed to a formidable extent during the earlier part of the monsoon were at last effectually checked partly by the cold and damp and partly by the vigorous measures which were undertaken to suppress them. More than 4 million rats were destroyed between the middle of July and the end of November. The consequence was that, as the rainfall was seasonable, the early crops were fair and the late crops were good. Rural population decreased by 35,539. The great preponderance of deaths over births, as exhibited in the Collector's 5th para., shows how defective birth registration is in Kaladgi. The recorded birth-rate is only 9.9 per mille. Public health during the year was good. What is popularly known as the famine fever, though it has not altogether disappeared, was much less prevalent than in 1898-79. The attendance of out-patients at dispensaries has increased from 12,751 to 13,158.

• The number of vaccine operations has again declined. Agricultural stock shows an increase under every head except "carts", the number of horned cattle having risen from 1,94,551 to 2,12,132 and of sheep and goats from 2,36,212 to 2,45,029. Labour has been scarce, and, as the season was a good one, it was in request, and wages have in consequence risen. The prices of the principal food-grains have declined, and that to a much greater extent than in adjacent districts, the obvious cause being the deficiency of communications throughout the district which confines cultivators to local markets for the disposal of their produce. Wheat has fallen from 4 to 11 sers per rupee, dal from 5 to 11 sers and jowari from 12 to 23 sers. Rs. 3,394 have been granted as takavi for the purchase of seed and cattle as against Rs. 10,540 granted on the same account last year.

2. The jumabandi settlement was punctually completed in all talukas. The results of the settlement are as under:—

	1878-80	1879-80	Increase	Decrease
	Rs.	Rs.		Rs.
Land Revenue for Cultivation	12,92,192	12,12,110		80,082
Saccharine Cultivation	10,884	52,081		41,197
Land Paid	112,541	1,77,117		65,576
	14,14,617	14,41,308		26,691

[illegible]

was sanctioned by Government Resolution No. 2002 of 9th June. Government approve of the course which Mr. Middleton has adopted in refraining from writing this large sum off the accounts until he has ascertained what it will be possible to realize from the sale of the occupancies of ryots whose land has been resumed. Abkari Revenue fell off to the extent of Rs. 7,579. The cause has been already mentioned. The farms for 1880-81 have been sold at an increase of Rs. 11,852 or 37 per cent. Land Revenue and Local Funds to the amount of Rs. 93,862 were expected to be outstanding on 31st July, but the great proportion of this was due on the lands of pauper or absconded ryots already referred to. Rs. 1,57,479 on account of arrears from former years were collected during the year under review, and adding this sum to the collections made in the same period on account of current year's revenue it appears that Rs. 63,616 in excess of the whole demand for the year was collected, which is creditable to the Revenue Officers. The number of notices issued (8,611) and of cases of Distraint (222) was not large considering the crisis through which the district has passed. Receipts from Provincial and Local Fund Road Tolls show a slight increase, while those from Ferries have declined. With reference to the remarks contained in his 23rd para., the Collector is probably now aware that the subject of altering the law relating to poisons is at the present time under the consideration of Government in the Judicial Department. Forest expenditure has increased from Rs. 8,148 to Rs. 9,073 and receipts have decreased from Rs. 2,478 to Rs. 1,709, the net result being an excess of expenditure over receipts of Rs. 7,364. Advantage has been taken of the transfer to the head of waste of a large area of cultivable land during the year to increase the area under forest which has been extended by 47 square miles. There has been a decrease of Rs. 7,321 in the receipts from Court Fee and of Rs. 4,753 in the receipts from General Stamps, which is accounted for by diminished litigation in the one case and a decrease in the number of conveyances of land in the other. The Collector should have shown the figures for 1878-79 as well as those for 1879-80 in the table at his 25th para. License Tax assessment as originally imposed amounted to Rs. 75,210, which were reduced to Rs. 69,763 or about 7 per cent. on appeal. 293 Revenue Patels and Kulkarnis or over 12 per cent. of the whole number were punished during the year.

3. The Collector personally did the jamabandi of two talukas and performed a fair amount of village inspection, though he might have visited more than 21 out of the 1,204 villages in the Kaladgi District. It is not understood how Mr. Cumine could report that his office library was in good order before he had had any opportunity of examining it. The destruction of useless records is much in arrears in Muddebihal, Badami and Bagalkot. Revised survey rates were introduced during the year into eleven villages of the Badami Taluka. Very few sanads have been issued under the Alienation Settlement. Government are aware that it is not easy to secure the attendance of recipients, but every endeavour should be made to clear off the arrears as soon as possible. The large increase of 2,51,675 acres in the area of waste land is due to causes already adverted to. The area of land under cotton cultivation has increased from 1,62,402 acres in 1878-79 to 2,23,664 acres in 1879-80, and the estimated outturn per acre is 23 lbs. as compared with 5 lbs. last year, but it is feared that much reliance cannot be placed upon the accuracy of this estimate. Government agree with the Commissioner that it is desirable that some efforts should be made to promote horse-breeding in Kaladgi, a district which in former years was noted for it. He should place himself in communication with the Inspecting Veterinary Surgeon on the subject.

4. 60 out of 104 decisions by Mamlatdars under Act III. of 1876 were examined by the Collector and 99 by his Assistants. Mr. Middleton states that he found that "6 cases had been unsatisfactorily disposed of." He does not enter into details, and does not mention whether the errors arose from failure of justice, or merely from want of formality in procedure. The numbers of crimes committed and persons convicted show a slight increase as compared with the preceding year. The criminal statistics will be more fully examined by Government in the Judicial Department. Six Police Patels hold commissions under Section 15, Clause 1, Bombay Act VIII. of 1867. The District Magistrate should not have failed to report the manner in which they discharge their duties.

5. Three meetings of the District Local Fund Committee, attended only by officials, were held during the year. The Public Works receipts were Rs. 1,37,998 including an opening balance of Rs. 58,759, and expenditure amounted to Rs. 81,624, leaving a closing balance of Rs. 56,374. Of the expenditure Rs. 41,158 were spent on new works, including 4 "roads", 2 dharmshālās and 1 tank, Rs. 14,815 on establishment, Rs. 18,664 on repairs and Rs. 3,046 on medical charges. The heading to the 1st column of the table at para. 55 should be, not "roads", but "roads in miles". Whether the figure 4 in the 1st column is meant to specify that 4 new roads or that 4 new miles of road were constructed there is nothing to show. The planting of road-side trees is of special importance in such a district as Kalāḍgi, and Government have noticed with approval the laudable exertions in this particular of the Māmlatdār of Bāgalkot, Rāo Sāheb Santāpa Rangāpa. The Collector refers to the grievous want of railway and telegraphic communication, which does not cease to engage the attention of Government but which they are not free to remedy. There are 4 Town Municipalities in the district, but no City Municipality. Their receipts during the year amounted to Rs. 17,756, of which Rs. 12,181 or over 68 per cent. were raised by Octroi duties. Of the expenditure, which amounted to Rs. 18,869, Rs. 4,503 or 23 per cent. were spent on establishment, Rs. 9,656 or 51 per cent. on health, and Rs. 2,273 or 12 per cent. on safety and convenience. The number of primary schools in the district has increased from 140 attended by 5,215 pupils to 146 attended by 7,073 pupils. There is a slight increase also in the attendance at the one superior school. 32 schools have been visited by the Collector in person.

6. Mr. S. B. Thākur's report is somewhat meagre, but he appears to take an interest in his duties. His first examination of the tāluka kacheri at Badāmi cannot have been thorough, as he completed it in 3 days. His village inspection generally was sufficient, but more boundary-marks ought to have been examined, and the condition of the old survey maps furnishes no reason for neglecting this duty. He appears to be inclined to punish village officers with indiscreet frequency and severity, and the Collector's attention should be called to the fact. Mr. Thākur deserves to be commended for the interest shown by him in the progress of education in his charge.

Mr. Camine's duties during the year have been heavy, but he has carefully attended to standing orders, except as regards boundary-mark inspection, which was insufficient. His report does not contain much matter of interest.

The tālukās reported on by Mr. Shrinivās Bāliji, District Deputy Collector, were during the greater part of the year under Mr. Bālkrishna Deorao, District Deputy Collector. That officer moved actively about his charge, but his boundary-mark inspection was very insufficient, as was also his inspection of schools. From the table at para. 13 of the report it would appear that the tāluka accounts of Indi and Sindgi were each examined in one day. It is presumed that this cannot have been so; but, as the Commissioner properly observes, the first examination of the accounts of Sindgi ought not to have been postponed till 26th February.

was sanctioned by Government Resolution No. 2002 of 9th June. Government approve of the course which Mr. Middleton has adopted in refraining from writing this large sum off the accounts until he has ascertained what it will be possible to realize from the sale of the occupancies of ryots whose land has been resumed. Abkari Revenue fell off to the extent of Rs. 7,679. The cause has been already mentioned. The farms for 1880-81 have been sold at an increase of Rs. 11,852 or 37 per cent. Land Revenue and Local Funds to the amount of Rs. 93,862 were expected to be outstanding on 31st July, but the great proportion of this was due on the lands of pauper or absconded ryots already referred to. Rs. 1,57,479 on account of arrears from former years were collected during the year under review, and adding this sum to the collections made in the same period on account of current year's revenue it appears that Rs. 63,616 in excess of the whole demand for the year was collected, which is creditable to the Revenue Officers. The number of notices issued (8,641) and of cases of distraint (222) was not large considering the crisis through which the district has passed. Receipts from Provincial and Local Fund Road Tolls show a slight increase, while those from Ferries have declined. With reference to the remarks contained in his 23rd para., the Collector is probably now aware that the subject of altering the law relating to poisons is at the present time under the consideration of Government in the Judicial Department. Forest expenditure has increased from Rs. 8,148 to Rs. 9,073 and receipts have decreased from Rs. 2,478 to Rs. 1,709, the net result being an excess of expenditure over receipts of Rs. 7,364. Advantage has been taken of the transfer to the head of waste of a large area of cultivable land during the year to increase the area under forest which has been extended by 47 square miles. There has been a decrease of Rs. 7,321 in the receipts from Court Fee and of Rs. 4,753 in the receipts from General Stamps, which is accounted for by diminished litigation in the one case and a decrease in the number of conveyances of land in the other. The Collector should have shown the figures for 1878-79 as well as those for 1879-80 in the table at his 25th para. License Tax assessment as originally imposed amounted to Rs. 75,210, which were reduced to Rs. 63,763 or about 7 per cent. on appeal. 223 Revenue Pâtels and Kulkarnis or over 12 per cent. of the whole number were punished during the year.

3. The Collector personally did the jamabandi of two talukas and performed a fair amount of village inspection, though he might have visited more than 21 out of the 1,204 villages in the Kaladgi District. It is not understood how Mr. Umiaé could report that his office library was in good order before he had had any opportunity of examining it. The destruction of useless records is much in arrears in Muldebihal, Badami and Bâgalkot. Revised survey rates were introduced during the year into eleven villages of the Badami Taluka. Very few sanads have been issued under the Alienation Settlement. Government are aware that it is not easy to secure the attendance of recipients, but every endeavor should be made to clear off the arrears as soon as possible. The large increase of 2,51,675 acres in the area of waste land is due to causes already adverted to. The area of land under cotton cultivation has increased from 1,62,402 acres in 1878-79 to 2,23,664 acres in 1879-80, and the estimated outturn per acre is 23 lbs. as compared with 5 lbs. last year, but it is feared that much reliance cannot be placed upon the accuracy of this estimate. Government agree with the Commissioner that it is desirable that some efforts should be made to promote horse breeding in Kaladgi, a district which in former years was noted for it. He should place himself in communication with the Inspecting Veterinary Surgeon on the subject.

4. 60 out of 104 decisions by Mâmbardâs under Act III. of 1876 were examined by the Collector and 39 by his Assistants. Mr. Middleton states that he found that "6 cases had been unsatisfactorily disposed of." He does not enter into details, and does not mention whether the errors arose from failure of justice, or merely from want of formality in procedure. The numbers of crimes committed and persons convicted show a slight increase as compared with the previous year. The criminal statistics will be more fully examined by Government in the Judicial Department. Six Police Pâtels hold commissions under Section 15, Clause 1, Bombay Act VIII. of 1867. The District Magistrate should not be asked to report the manner in which they discharge their duties.

5. Three meetings of the District Local Fund Committee, attended only by officials, were held during the year. The Public Works receipts were Rs. 1,37,998 including an opening balance of Rs. 58,759, and expenditure amounted to Rs. 81,654, leaving a closing balance of Rs. 56,374. Of the expenditure Rs. 41,158 were spent on new works, including 4 "roads", 2 dharmshālis and 1 tank, Rs. 14,815 on establishment, Rs. 18,664 on repairs and Rs. 3,046 on medical charges. The heading to the 1st column of the table at para. 55 should be, not "roads", but "roads in miles". Whether the figure 4 in the 1st column is meant to specify that 4 new roads or that 4 new miles of road were constructed there is nothing to show. The planting of road-side trees is of special importance in such a district as Kalāḍgi, and Government have noticed with approval the laudable exertions in this particular of the Māmlatdār of Bāgalkot, Rāo Sāheb Santāpa Kāngāpa. The Collector refers to the grievous want of railway and telegraphic communication, which does not cease to engage the attention of Government but which they are not free to remedy. There are 4 Town Municipalities in the district, but no City Municipality. Their receipts during the year amounted to Rs. 17,756, of which Rs. 12,181 or over 68 per cent. were raised by Octroi duties. Of the expenditure, which amounted to Rs. 18,869, Rs. 4,503 or 23 per cent. were spent on establishment, Rs. 9,656 or 51 per cent. on health, and Rs. 2,273 or 12 per cent. on safety and convenience. The number of primary schools in the district has increased from 140 attended by 5,215 pupils to 146 attended by 7,973 pupils. There is a slight increase also in the attendance at the one superior school. 32 schools have been visited by the Collector in person.

6. Mr. S. B. Thākār's report is somewhat meagre, but he appears to take an interest in his duties. His first examination of the tāluka kacheri at Badam cannot have been thorough, as he completed it in 3 days. His village inspection generally was sufficient, but more boundary-marks ought to have been examined, and the condition of the old survey maps furnishes no reason for neglecting this duty. He appears to be inclined to punish village officers with indiscreet frequency and severity, and the Collector's attention should be called to the fact. Mr. Thākār deserves to be commended for the interest shown by him in the progress of education in his charge.

Mr. Gamble's duties during the year have been heavy, but he has carefully attended to standing orders, except as regards boundary-mark inspection, which was insufficient. His report does not contain much matter of interest.

The talukās reported on by Mr. Shrināth Bālija, District Deputy Collector, were during the greater part of the year under Mr. Balkrishna Deorao, District Deputy Collector. That officer moved actively about his charge, but his boundary-mark inspection was very insufficient, as was also his inspection of schools. From the table at para. 13 of the report it would appear that the taluka accounts of Indur and Sūrgur were each examined in one day. It is presumed that this cannot have been so, but, as the Commissioner properly observes, "the examination of the accounts of Sūrgur ought not to have been postponed till 20 February."

For Acting Secretary to Government.
